

Having 12+ years of overall experience of which five years have been as an AWS. Implement large scale cloud deployments, managing cloud operations by building sustainable processes and cross functional teams with cloud & devops skills. Worked in agile model

**Professional Abridgment:**

- ✓ Worked as Senior Cloud Engineer in **Oportun(intelizest)** from **Mar 2020 to Nov 2022**
- ✓ Worked as Devops Engineer in **VueData Technologies** from **Apr 2017 to Oct 2019**
- ✓ Worked as a Team Lead in **PayPal (UST Global)** from **Apr 2016 to Feb 2017**
- ✓ Worked as a Technical Lead with **Relevance Lab Ltd** from **May 2014 to Jan 2016**
- ✓ Worked as a Senior Project Lead in **IGate Global Solutions** from **Dec 2011 to Feb 2014**
- ✓ Worked as a Software Developer in **Scope International (CSS Corp)** from **Dec 2009 to Dec 2011**
- ✓ Worked as a Software Developer in **Polaris** from **Jan 2008 to May 2009**

**Academic Outline:**

- ✓ **Bachelor of Computer Applications (BCA)** from Sri Venkateswara University in 2004

**Technical Skills:**

**AWS:** EC2, ELB, ASG, LT, VPC, ENDPOINTS, PEERING, IAM, CLOUDFORMATION, S3, EBS, SNAPSHOT, EFS, CLOUDWATCH, CLOUDTRAIL, SNS, SQS, ROUTE53, AWS CONFIG, ECS, EKS, IGW, NACL, SG, KEY MANAGEMENT SERVICE, AWS COST EXPLORER, AMAZON MQ, RDS - MYSQL, DYNAMODB

**TOOLS:** JENKINS, TERRAFORM, MAVEN, SVN, GITHUB, DOCKER, KUBERNETES

**PROGRAMMING/SCRIPTING:** JAVA, SHELL, AWS CLI, JSON and YAML

**OPERATING SYSTEMS:** WINDOWS, UBUNTU, LINUX - AMAZON & RHEL LINUX

**Description:**

The Sequent platform provides a friction-free ecosystem that tokenizes any identity, credential or transaction. The Sequent Platform enables mobile and IoT devices to securely manage data transactions through applications with the Sequent Token Requestor, The Token Issuer, the Token Validator. Sequent's Trust Authority and Token Vault ensures data verification and data management, including through issuing banks, retailers, and National Payment Networks.

**Environment and Technologies** Java, Microservices, Spring boot, Jersey Restful Web services, Selenium, Jenkins, Docker, Kubernetes, Maven, GIT, JIRA and AWS.

**Responsibilities:**

- Worked on performing deployments and managed services for infrastructure on AWS Cloud
- Preparing documents Involved in documentation, review, analysis and fixed post production issues
- Preparing Impact Analysis and Technical Specifications for Change Requests
- Completely involved with the entire deployment process to all ENV servers
- Provided a set of different technical and process related trainings to the teams and involvement to the new POCs

## **Projects Abstract:**

### **Project: Sequent Services**

#### **Client: Sequent**

#### **Description:**

The Sequent platform provides a friction-free ecosystem that tokenizes any identity, credential or transaction. The Sequent Platform enables mobile and IoT devices to securely manage data transactions through applications with the Sequent Token Requestor, The Token Issuer, the Token Validator. Sequent's Trust Authority and Token Vault ensures data verification and data management, including through issuing banks, retailers, and National Payment Networks.

**Environment and Technologies** Java, Microservices, Spring boot, Jersey Restful Web services, Selenium, Jenkins, Docker, Kubernetes, Maven, GIT, JIRA and AWS.

#### **Responsibilities:**

- Worked on performing deployments and managed services for infrastructure on AWS Cloud
- Preparing documents Involved in documentation, review, analysis and fixed post production issues
- Preparing Impact Analysis and Technical Specifications for Change Requests
- Completely involved with the entire deployment process to all ENV servers
- Provided a set of different technical and process related trainings to the teams and involvement to the new POCs

Responsible in all stages SIT, UAT, DR and Production environments, for overall technical quality

### **Project: PayPal Wallet**

#### **Client: PayPal**

#### **Description:**

The wallet feature lets people pay with a PayPal account, a credit or debit card, bank account or a line of Bill Me Later credit that can be applied for within the app. Like Google Wallet, the new PayPal app incorporates deals and discounts that are then automatically applied when you pay and use by the international customers. PayPal India is the faster, safer way to send money, make an online payment, receive money or set up a merchant account, through different end clients. Different flows are incorporated here like Security flow for authenticating valid client; transaction flow to track the audit activities of the web service requests which helps as part of billing module; write flow is the main flow that hits the actual web service call based on the request URL. Project supports both XML and JSON formats for request and response.

**Environment and Technologies** AWS, Docker, Kubernetes, Java, spring, Jersey Restful Web services and Jenkins

#### **Responsibilities:**

- Develop new features are modify existing features
- Took a Scrum Master role in the process of building the Web services write project from the beginning by building the core framework for the request flow and created the required environment. Effectively usage of JIRA to track the development activities
- Providing the estimates, actively conducted and involved in Sprint planning, Daily Scrum, Sprint review, Sprint Retrospective meetings and PowerHub Governance calls
- Preparing Impact Analysis and Technical Specifications for Change Requests

### **Project: Litpro, BookManager**

#### **Client: Scholastic**

#### **Description:**

Lexile Framework is a combination of functionality SRI and SRC that has been upgraded to support deployment and use by the international customers.

**Environment and Technologies** include Core Java, spring, Jersey Restful Web services, Hibernate, Jenkins, Maven, GIT, JIRA and UNIX Server.

***Responsibilities:***

- Involved in all the SDLC phases from requirements to implementation
- Involved in design review meetings to implement the Account Planning application using java, j2ee, struts, spring, server related and application related like NAS mounting batch jobs, services.
- Good in communication with the onshore and business teams
- Implementing Security fixes
- Optimized the application code for Performance gain

***Project: Info Manager***

***Client: Standard Chartered***

***Description:***

Info Manager Trade is a trade reporting tool available via Straight2Bank. The main objective of the Info Manager project is to offer our customers a timely reporting facility, the ability to view the images of documents presented against their Trade Transactions (Letter of Credit, Documentary Collections, Guarantees and OAF) and to provide alerts as and when a trade activity transpires.

**Environment and Technologies** include Core Java, proprietary framework and UNIX Server.

***Responsibilities:***

- Support for SIT, UAT, DR and production implementation.
- Involved in enhancements of Alerts and Reports.
- Preparing Impact Analysis and Technical Specifications for Change Requests.
